Agile Project Management - Advanced

Duration: 2 days
Audience: Chargé de projet

Who is this training for?

Agile Project Managers, Scrum Masters, Product Owners and Development Team Members: Beginners, Intermediate, or Advanced

Training objectives

- Deepen and master the tools and techniques of agile project management with the Scrum approach
- Acquire a common vocabulary

Summary

Become the expert in Agile project management with the Scrum approach. This training, which is very focused on practice and interaction, allows students to understand and apply the best practices of agile project management according to the Scrum approach. With the help of a practical case, participants work in teams on four (4) practical workshops/simulations and benefit from the coaching.

Course outline

- Reminder • Workshop number 1 on the product notebook: writing user stories, epics, themes
- Workshop number 2 on estimating user stories: sizing with planning poker and other estimation methods
- Workshop number 3 on the sprint notebook: parts 1, 2 and 3 with team capacity (velocity) and creation of the sprint notebook
- Workshop number 4 on the sprint: Daily scrums, burndown charts, task board (kanban) and problem list
- Practical case study with exercises, workshops, simulations, role-plays

Approach and methodology
