CompTIA - Server+®

Duration: 5 days
Audience: Professionnel TI

Who is this training for?

This training is mainly intended for:

- Technicians and system administrators who are called upon to install, configure, manage and troubleshoot servers.
- IT support professionals who want to move into responsibilities related to server environments.
- Mid-level IT technicians with a solid foundation in hardware and systems, typically CompTIA A+ certified or equivalent.
- Professionals with 6 to 12 months of hands-on experience in IT support or PC environments and wishing to develop skills in server infrastructure. The training is suitable for those who work (or aspire to work) in environments that include physical and virtual servers, storage solutions, monitoring tools, as well as disaster recovery plans.

Training objectives

- Install and upgrade server-grade hardware
- Install and configure server NOS and application software
- Configure RAID arrays
- Use management and monitoring tools
- Create disaster recovery plans
- Troubleshoot hardware, storage, network, and software issues

Summary

You will become proficient in the following modules: installing and upgrading server-class hardware, installing and configuring server NOS and application software, configuring RAID arrays, using management and monitoring tools, creating disaster recovery plans, troubleshooting hardware, storage, networking, and software issues.

Course outline

- Install and upgrade server-grade hardware
- Install and configure server NOS and application software
- Configure RAID arrays
- Use management and monitoring tools
- Create disaster recovery plans
- Troubleshoot hardware, storage, network, and software issues

Approach and methodology

Infrastructure-oriented approach, based on practical activities of installation, configuration and troubleshooting of servers, integrating real cases of management, monitoring and continuity of services.

Prerequisites

- Have taken and passed both CompTIA A+ certification exams or equivalent content or have equivalent knowledge and experience.

Recommendations

- 6 months to one year of support experience after A+ certification or equivalent content.
- Extensive experience supporting end-users and PC-based systems.

Certifications

Certification Exam Objectives: SK0-005
